"There is \$104,000,000 of gold reserve anks to keep up the appearance of maintaining it, and, counting only the actual available cash assets of the Treasary as they were counted by former secretaries, there is a deficit of over \$10,000,-000. All the gold shipped to Europe comes direct from the Treasury vanits, and the vernment now receives no gold revenues. Justoms duties can be paid in coin notes, and gold has ceased to come into the Treasury.

"The early issue of bonds seems to be

President J. Edward Simmons, of the Fourth National Bank, said in regard to the above despatch: "The writer seems to take an ex-treme view of matters and makes several incorrect statements as well. To say that the Treasury is in a bankrupt condition is

are all that are needed to make the financial condition of the Treasury perfectly sound.

"If a man has an income of say 440,000 a year and in one year he spends \$60,000 we would not necessarily say he was going to the poor-house. It is the same with the Treasury at the present time.

"I see that it is stated that the Treasure has borrowed 88,000,000 gold from the braks. This is not true. The banks simply changed their gold for another kind of money which is just as good-namely, legal-tender and Treasury notes. They stand in the same position as any other holder of this paper money and can get gold for it on demand. This is what the \$100,000,000 of gold in the Treasury is for, to redeem these notes. Such

Treatury is for, to redeem these notes. Such reckless statements are calculated to do lajury rather than good.

"As to the statement that the late Secretary of the Treasury has been intentionally conocaling the real situation of affairs, I do not think this is accurate. He certainly has not given, however, all the information that could be desired.

The process which they have been adopting to get our gold for a long time past has been to sell their 4 per cent, bonds and use the avails to buy our gold with, dragging it from us in an unmeralful way as against the spirit of comity which should prevail among nations. Why, therefore, does not our Government start out without delay in this contest for gold and use her superior credit to put out bonds at a rate that will not cost over 3 per cent, per annum,

noat them in Europe and draw gold from them?

"This would be an effectual checkmate to any further attempts to take our gold from us. It would but require such an evidence of entering the struggle on the part of our Government to make them think twice on the other side before continuing their present methods of forcing this country to surply the Austrian, Russian and French hoarding of gold.

There is trouble brewing between the Brooklyn Health officers and the Quar- D. Schwartz Company, Broadway and antine authorities, over the disposition Park avenue , Williamsburg, was held of the cargo and crew of the steamship for the Grand Jury in the Lee Avenue J. W. Taylor, of the Busk & Jevons line, which reached her dock at the foot of Pearl street, Brooklyn, yesterday. The vessel piles between Brooklyn and the Brazilian port of Santos. During the passage the chief engineer died, this morning. the passage the chief engineer died, and on the ship log the captain entered the cause of death as typhus.

The man having been taken sick Feb. 9, and death following only four days later, the Quarantine authorities concluded that the cause of death could not have been from typhus; but as a precautionary measure, they wrote across her bill of health the words. "Don't let anybody land."

This was reported to Deputy Health Commissioner Young, and he gave orders that the ship should be strictly guarded, and that neither cargo nor crew should be landed. This action was commfunicated to the Quarantine authorities this morning, and they telephoned a reply that such action was not necessary.

Dr. Young answered back that it

would not be considered as broke by a large majority.

That is the position of the Treasury. Its a valiable cash has been depleted by reckless extravagance and over-appropriations, but its resources are practically unlimited. But for that recklessness and the penny wise and pound foolish policy of President Harrison's Administration it would have all the gold it heeded to-day.

"That our credit is higher that of any foreign nation was shown when Mr. Fairbell was Secretary of the Treasury. There will be no need of placing additional taxes upon the people. Economy and retrenchment are all that are needed to make the financial condition of the Treasury perfectly sound.

Dr. Purdy and Dr. Jewett, who ques-tioned the captain of the Taylor, are of opinion that the engineer died from yel-low fever.

The officers and crew on board the Taylor number about forty men, and they are loudly protesting against the detention, while doctors are disagreeing.

SCULPTOR DE LUCCA CAUGHT.

Held for the Present on a Charge of Abandonment.

Michael Angelo De Lucca, the Italian wives was held in the Lee Avenue Williamsburg, to-day, on charge of abandonment.

Officer Short, of the Brooklyn Charities Department, arrested De Lucca at 41 Mulberry street last night on the complaint of his legal wife, who believed that she might as well be supported by him, under the circumstances, and the other wives have apparently agreed with her.

It is supposed that charges of bigamy will be preferred against De Lucca later in the day, but at present he is only held on the one charge.

The story of De Lucca's escapades was told in "The Evening World" last week. The man is a sculptor, and a short time ago accepted a contract to cut a statue of a saint for a New York Italian society, the agreement being that he should remain locked up at 41 Mulberry street, with his statue, until it was completed.

While he was away, these women, each of whom claimed to believe she was his legal wife, found by chance that De Lucca was a much-married man. On three different occasions, it is alleged, he went to Italy and made a bridal tour of his return trip.
